

Oliveri®

THIS BATHTUB MUST BE INSTALLED BY A LICENSED PLUMBER IN ACCORDANCE WITH LOCAL REGULATIONS

CARE & MAINTENANCE

Clean with a soft cloth and warm soapy water as necessary – rinse and dry after cleaning. Avoid using abrasive or acid based cleaning products.

WARRANTY

This bathtub is warranted to be free from manufacturing defects for a period of 10 years bath shell, 1 year labour, when used in a domestic situation.

This warranty does not cover against normal wear and will be voided if the product is misused or not installed in accordance with these instructions.

In the event this product is rendered obsolete and a replacement product is required. Oliveri Solutions reserves the right to supply a product of equal substitution at their discretion.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be acceptable quality and the failure does not amount to a major failure.

SERVICE

If the Installer is satisfied that the problem is not due to poor installation, contact T2 Services Pty Ltd for assistances on:

Ph: (07) 5596 0738

Fax: (07) 55273353

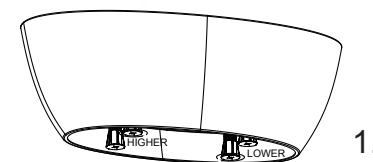

Email: oliveri@t2services.com.au

<https://oliveri.com.au/service-and-warranty>

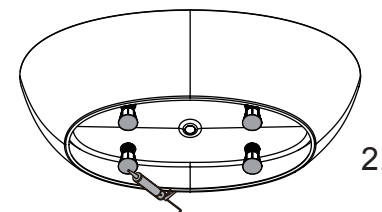

If a warranty service agent finds that the bathtub is not at fault, T2 Services Pty Ltd reserves right to pass on any callout fee to the householder.

Installation Instructions

Before installing the bath please read these instructions carefully to familiarise yourself with the required tools, materials and installation sequences. This will help you avoid costly mistakes. The installation documents included assume that walls are plumb and floors are level. Slight adjustments to the installation procedure may be required for out-of-square surfaces.

These instructions contain important care, cleaning and warranty information. Please leave these instructions for the consumer after installation.

1. Unpack the bath and check for any transit damage prior to installation.
2. Position the bath in the desired location in the bathroom.
3. Check that the plumbing can be connected to the bath when in the desired location and that the positioning of the bath does not interfere with other bathroom fixtures.
4. Install the waste system (not supplied) in accordance with the manufacturer's instructions. Please adhere to the relevant sections of NZS 3500 plumbing standard.
5. Raise the Free Standing bath off the floor by propping it up onto timber blocks positioned at either end of the bath. Install and connect the waste outlet.
6. Adjust the feet so that the bottom of each foot is protruding approximately 3 to 5mm from the underside of the bath. The feet must extend past the bath shell to take the weight of the bath. Feet should be level with each other so that the weight of the bath is evenly supported by the four feet.(Refer Image 1)
7. Carefully remove the timber blocks and use a spirit level to check that the bath is level with the floor, adjust feet as necessary..(Refer Image 2)
8. Carefully tilt the bath backward and apply an appropriate adhesive to each of the bath feet. Lower the bath back into position..(Refer Image 3)
9. Apply silicone sealant between edges and adjacent surfaces ensuring that a watertight seal is formed. (Refer Image 4)
